-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19 describes a dosage capillary that has two ends. In a second position one end of the capillary is in communication with a diluent chamber and the other end is in communication with the measuring chamber. The relationships of the two ends are clear for the second position. However, the first position is described as the dosage capillary only being in communication with a sample-loading zone. It is not clear what the other end of the capillary is connected to when in the first position.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19-40 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Warden et al.

Warden et al. teach a disposable test device(100) for analysis of biological fluids. A sample container(110) is mounted in sample receiving element(120) that comprises well(122). Needle(124) communicates the sample via a first channel(126) to a first

Art Unit: 1743

chamber(130). There are second and third associated channels (e.g. channel(134) and channel(142) respectively) with the chamber(130). These channels are connected to manifold(150) which in turn is connected to chamber(160a-d) that contains the reagent to perform the analysis. The claimed sample-dosing device has been read on the taught manifold, diluent chamber has been read on the first chamber(130) and the measuring chambers on the chambers(160a-d). Column 13 lines 31+ teach exit ports that allow air to escape by not fluid which has been read on the claimed ventilation valve structure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lyle A Alexander whose telephone number is 571-272-1254. The examiner can normally be reached on Monday, Wednesday and Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
